

MODERN SYSTEMS FOR PUBLIC SERVICE

Focused software delivery for public agencies and the teams that support them.

CedarVane Systems LLC is a founder-led Washington software consultancy focused on bounded custom applications, mobile systems, integrations, data workflows, reporting automation, and maintainable modernization.

Core competencies

- Custom internal and public-facing applications
- Native iOS, mobile, and offline-capable systems
- Responsive web applications and dashboards
- REST APIs, backend services, and cloud integration
- Databases, migration, reporting, and PDF generation
- Bluetooth/BLE, IoT, firmware, and device integration
- AI-assisted document and workflow automation
- Automated testing and maintainable modernization

Government-relevant solutions

- Field inspection, service, and offline data capture
- Permit, case, approval, and internal workflow tools
- Operational dashboards and document generation
- Targeted data migration and legacy integration
- Accessible public websites and digital services
- AI-assisted intake, search, and summarization with human review

Differentiators

- 01 Senior involvement**
Direct access to founder-level engineering from discovery through handoff.
- 02 Right-sized delivery**
Specialists are added for design, accessibility, security, DevOps, or domain needs when the scope requires them.
- 03 Risk-conscious execution**
Focused increments, automated testing, clear documentation, and no unnecessary platform replacement.
- 04 Remote-first clarity**
Planned Pacific-time overlap, explicit milestones, and documented handoffs.
